TECHNICAL SKILLS

- Project Management
- Software Development
- Machine Learning
- Data Analysis
- UI/UX
- Illustration/Design

PROGRAMMING
LANGUAGES, TOOLS, &
FRAMEWORKS

- Python, Sckit-learn, Pandas
- Figma
- Microsoft Office Suite
- Google Colab
- VSCode

CORE WORK SKILLS

- Analytical Thinking
- Problem Solving
- Collaboration
- Flexibility & Agility
- Adaptability
- Communication

Profile Summary

A fourth-year Information Technology student specializing in Business Informatics with a proven track record as a Project Manager for complex, decentralized systems. Combines a strong interest in Data Science with practical experience in Data Analysis. Dedicated to bridging the gap between technical project leadership and data-driven insights to build efficient, scalable solutions.

Education

BS in Information Technology

2023-Present
PHINMA - University of Pangasinan

Science, Technology, Engineering, and Mathematics

2021-2023
Colegio de San Juan de Letran - Manaoag

Projects

Lifeline: Blockchain-Based Emergency Volunteer Coordination

Project Manager, ML Engineer | Junior Capstone Project | 2026

- Led planning and system architecture for a blockchain-based emergency volunteer coordination platform, defining technical requirements, system design, and project deliverables.
- Engineered a route optimization model using the Random Forest algorithm to calculate efficient dispatch paths based on flood hazard scores and rainfall data.
- Developed and evaluated predictive ML pipelines using RMSE, R², and MAE to optimize emergency dispatch decisions under simulated disaster scenarios.
- Authored and managed the comprehensive capstone manuscript, coordinating requirements, system documentation, and technical deliverables for the capstone defense.

InternConnect: Bridge for Students and Career-Building Opportunities

Project Manager, UI/UX Designer | Junior Final Project | 2025

- Led the software development lifecycle from requirements gathering and user stories to system specifications, RBAC, and milestone planning.
- Designed high-fidelity student and employer portal prototypes in Figma, establishing reusable UI components and accessible user flows.
- Analyzed simulated system usage data exported as CSV by creating Tableau visualizations to identify usage trends, patterns, and data-driven insights.

Leadership Experience

Student Council Treasurer

CITE Student Council, PHINMA - University of Pangasinan
Academic Year 2024-2025

- Managed a ₱100,000+ council budget, directing fund allocations and expense tracking for all college activities while maintaining strict fiscal discipline with zero budget deficits.
- Oversaw collection and documentation of student payments for organizational merchandise—including official pins, nameplates, and college shirts—ensuring 100% accounting accuracy and timely vendor liquidation.
- Coordinated funding requests and reimbursements with university administration and council officers to execute student-led programs for the college community.

Seminars Attended

Pythonic Alchemy: Brewing Magic in Code

October 14, 2023

Building Bridges: Leadership Communication Training for Success

September 13, 2023
