PROFESSIONAL SUMMARY

Aspiring Junior Data Engineer and fourth-year BSIT student with hands on experience in SQL, Python, AWS, and database management. Passionate about building scalable data pipelines and cloud based data solutions while continuously expanding my technical skills.

TECHNICAL SKILLS

- Programming Languages: Python, SQL
- Scripting: Bash
- Databases: MySQL, PostgreSQL
- Cloud: AWS
- Data Transformation: dbt
- Version Control: Git, GitHub

PROJECT

Bolosan ES Learners' Information Management System
(BLIMS) | 2026

Backend Developer

Tech Stack: HTML, CSS, JavaScript, Node.js, MongoDB

- Developed backend APIs using Node.js to manage learner information, grading, and school announcements.
- Designed and maintained MongoDB collections for storing and retrieving student and academic data.
- Implemented CRUD operations to ensure accurate and efficient data management.
- Worked with JSON data and database queries to support application functionality.
- Collaborated with the development team to build and maintain the system.

EDUCATION

College

PHINMA University of Pangasinan

Bachelor of Science in Information Technology (BSIT)

(Currently Enrolled)
